

## Installation Instructions Voltage Regulator L-4603

### STEAHLY OFF ROAD VOLTAGE REGULATOR

Part number L-4603

For 12-volt AC (no battery) applications. Limits voltage to 14.5 to eliminate burnt out bulbs.

This regulator may be mounted on the back of the headlight or other convenient location; the housing does not need to be grounded. The yellow wire of this regulator attaches to the power wire of the lighting coil/stator (usually yellow). The black wire of this regulator attaches to ground (the frame). Make sure the frame is clean and paint free at the attachment location.
